

Dear FCC: Captioning is crucial for me in order to participate in society and not be isolated. I am in the profoundly deaf/hearing impaired category and must rely on the written communications in numerous venues in order to know what is going on! I am a full time student and also must use a captionist in order to take classes; there is no other sensory system in place for me if you eliminate captioning. (Try writing notes to people and see how long they tolerate that.) Do not decrease our services. Thank you.
